

C2SM SPECIAL SEMINAR SERIES 2015 GREENHOUSE GAS FLUXES AND SINKS

November 24 – Grégoire Broquet (LSCE, Paris)

Potential of in situ and satellite observations for estimating greenhouse gas fluxes at city and national scale

Time & Location : Tuesday 24 November, 10:15 am, ETH Zurich, CHN P12

Host: Dominik Brunner (Empa)

October 12 – Ingeborg Levin (University of Heidelberg)

European carbon balance: what we can learn from isotope observations

Time & Location: Monday 12 October, 4:15pm, U. Bern, room B5, Sidlerstrasse 5, Bern

Host: Markus Leuenberger (Universität Bern)

March 17 – Ben Poulter (Montana State University)

Toward an updated global wetland CH₄ budget: progress, challenges and data needs

Time & Location : Tuesday 17 March, 9:30 am, ETH Zurich, CHN L17.1

Host: Andrea Stenke (ETH Zürich)

July 13 – Heinrich Bovensmann (University of Bremen)

Remote sensing of the greenhouse gases CO₂ and CH₄ from space - Towards disentangling natural and anthropogenic fluxes

Time & Location : Thursda, 25 June, 4:15 pm, ETH Zurich, CHN L17.1

Host: Dominik Brunner (Empa)

The seminar series is sponsored by the SNF Sinergia CarcoCount-CH project, the CCES MAIOLICA-II project and the Center for Climate Systems Modeling (C2SM).
